omegon

Omegon® Steeltrail 2" Newton Crayford, Dual Speed Focuser

Congratulations on the purchase of the new Omegon Steeltrail 2" Newton Crayford focuser. This focuser is a high quality focuser that allow precision focusing even with heavy eyepieces or cameras. It has a dual speed focusing system for precise focusing (1:10 rate). It is compatible with focuser base plates with a 78mm insert hole and also with Omegon 33360 Base plate for Newtonians (80mm).

1. Included Accessories

Included is low profile 2" to 1.25" adapter and an Allen wrench.

2. Getting Started

- 2.1. Start by releasing the two hex screws on your focuser base plate. Use a hex Allen wrench to do this.
- 2.2. Insert the focuser in the base place insert hole, make sure to adjust to the required position.
- 2.3. Make sure to retighten the base plate hex screws. The focuser should be securely tighten after this.

3. Important Features of the focuser (figure on the left)

1. Dual Speed Knob. Allows precision focus adjustment (1:10 rate from standard focusing knob)
2. Focusing Knob
3. Break thumbscrew. Locks focuser drawtube.
4. Friction adjustment hex screw. Use a 5mm Allen Wrench to adjust friction. The friction was already optimized in the factory and should only be changed if necessary.
5. 2" to 1.25" step-down adapter.
