

# Instruction Manual

## Omegon® Advanced Finderscope Base

*Congratulations on the purchase of the new Omegon Advanced Finderscope Base. This base is compatible with Omegon Advanced telescopes (203 and 153mm) and also some telescope models made by Bresser and Meade. It includes the base and the Vixen/Synta compatible finder shoe. It allows the use of Vixen/Synta-type dovetails with these telescopes.*

### 1. Included Accessories

Included is the tube base and the Vixen/Synta-type finderscope shoe/base.

### 2. Getting Started

2.1. Remove the original finderscope base.

2.2. Place the tube base on the tube as shown. Use the screws and nuts from the original finderscope base to fix it (screws and nuts not included).

2.3. Place the finderscope shoe on top of the tube base. Use a Philips screw driver to fix it to the tube base. Make sure all screws are well tightened.

You are now ready to use the Vixen/Synta-type compatible finderscope with your Omegon Advanced telescope.

### 3. Parts and features

1. Finderscope fixing thumbscrew;
2. Finderscope shoe's fixing screws;
3. Tube base;
